The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor or broker. The figures do not take into account your personal tax situation, which may affect how much you get back.

This table shows the money you could get back over the recommended holding period, under different scenarios, assuming that you invest \$10000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

### What happens if GraniteShares Financial plc is unable to pay out?

The product is not protected by the Irish Deposit Guarantee Scheme or any other investor compensation or guarantee scheme. This means that if GraniteShares Financial plc is unable to pay out, you may lose all of your investment. Since the ability of GraniteShares Financial plc to pay out depends on receiving amounts due under the product from the Swap Provider, the Swap Provider provides assets daily to a segregated account as collateral for such obligations with a value equal to or in excess of the value of the daily price of the product. If the Swap Provider is unable to pay GraniteShares Financial plc, its ability to pay out will be limited to the amounts realised from such collateral, as further explained in the Prospectus.

### What are the costs?

#### Costs over time

The Reduction in Yield (RIY) illustrates the impact the total costs you pay may have on your investment return. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the recommended holding period, and assume you invest \$10000. The figures are estimates and may change in the future.

Investment \$10000	If you cash in after one (1) day
<b>Total costs</b>	\$444
Impact on return (RIY) per year	1.48 %

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

#### Composition of costs

The table below shows :

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different cost categories.

<b>This table shows the impact on return per year</b>
