

PRODUCT DESCRIPTION

GraniteShares 2x Short Sandisk Daily ETP is a collateralised, Exchange-Traded Product (ETP). The ETP tracks, excluding fees and other adjustments, the performance of the Solactive Daily Leveraged 2x short Sandisk Index that seeks to provide -2 times the daily performance of Sandisk Corporation. For example, if Sandisk rises by 1% over a day, then the ETP will rise by 2%, excluding fees and other adjustments. However, if Sandisk Corporation falls by 1% over a day, then the ETP will fall by 2%, excluding fees and other adjustments.

KEY FEATURES

- Simple to trade, no need to borrow or short stocks
- Magnify returns in a single trade
- Investors cannot lose more than the amount invested, and the ETP features an intra-day mechanism to cushion large intra-day falls
- Liquid, trades like an equity on exchange with market makers supporting the liquidity
- Collateralised
- No need to complete a W-8BEN form

KEY RISKS

- Investing in Short and Leveraged ETPs is only suitable for sophisticated and informed investors who understand leverage, daily rebalancing and compounded daily returns and are able to support magnified losses
- Investors can lose the full value of their initial investment, however they cannot lose more than their initial investment
- Losses are magnified due to the nature of leveraged returns. Therefore, Short and Leveraged ETPs are only suitable for investors willing to take a high level of risk
- Daily compounding may result in returns which an investor may not expect, if the investor has not fully understood how such ETPs work
- Due to daily rebalancing and compounding, returns measured over periods longer than one day may differ significantly from the underlying stock return over those periods
- In the event a swap counterparty defaults, the proceeds from the realisation of the collateral may be less than what the investor expects
- Investors should only use Short and Leveraged ETPs if they have the ability to monitor their positions daily or during the day
- Please see the risks factors section of the Prospectus for a more detailed discussion of the potential risks

PRODUCT OVERVIEW

Product Name	GraniteShares 2x Short Sandisk Daily ETP
Underlying Stock	Sandisk Corporation
Leverage Factor	-2x
Base Currency	USD
Structure	ETP
Dividend	Reinvested
Total Ongoing Costs*	0.018794% per Day

General Notice

This document does not constitute an offer to buy or sell or a solicitation of an offer to buy securities in any company. This document is not intended for distribution to any other country where such distribution or use would be contrary to local law or regulation. Specifically, this document is not intended for general distribution in the United States or Canada.

Investing in financial markets involves a substantial degree of risk. Nothing described herein is intended to imply that an investment is "safe", "conservative", "risk free" or "risk averse". This document does not consider the specific investment objective, financial situation or particular needs of any potential investor and is intended only for those investors who are capable of understanding the risk of loss of all or a substantial part of their monies. Potential investors in the UK are reminded that they will not benefit from the UK investors compensation scheme.

Nothing contained herein constitutes investment, legal, tax or other advice nor is to be relied upon in making an investment or other decision. No recommendation is made positive or otherwise, regarding individual securities or investments mentioned herein. Any summary list of risk factors does not purport to be a complete enumeration or explanation of the risks involved in an investment in short and leveraged products. Prospective investors must consult with their own legal, tax and financial advisers before deciding to invest.

This document contains the opinions of the author and such opinions are subject to change without notice. The source of data is GraniteShares unless otherwise stated. No guarantee is made to the accuracy of the information provided which has been obtained from sources believed to be reliable. This document and the information contained herein is intended only for the use of persons (or entities they represent) to whom it has been provided.

Risk Factors

An investment in a GraniteShares short and leveraged exchange traded product ("ETP") may not be suitable for all investors. They are intended for investors who wish to take a very short term view on the underlying asset and are not intended as buy and hold investments.

Performance and capital loss: Past performance is not a reliable indicator of future results. The value of an investment may go down as well as up and can result in losses, up to and including a total loss of the amount initially invested.

Generic risks: Investments in ETPs involve numerous risks including, among others, company risks, general market risks, credit risks, foreign exchange risks, interest rate risks, geopolitical risks and liquidity risks.

Specific product risks: The Index is constructed to track the performance of an increased (leveraged) and/or short exposure to the underlying asset. A fall (or rise where short and leveraged exposure) in value of the underlying asset can result in a greater reduction in the level of the Index. The Index is designed to do this on a daily basis only which should not be equated with seeking a leveraged position for periods longer than a day. The ETP's performance over periods longer than one day will not be correlated or symmetrical with the returns of the underlying asset. Potential investors should refer to the section entitled "Risk Factors" and "Economic Overview of the ETP Securities" in the Prospectus relating to the GraniteShares ETPs for further details of these and other risks associated with an investment in short and leveraged ETPs and consult their financial advisers as needed.

Counterparty risk: An investment in a GraniteShares short and leveraged ETP involves counterparty risk. GraniteShares Financial plc has entered into a Swap Agreement with a counterparty, Natixis, that is backed with collateral. Failure of the counterparty to make payments may result in an investment in an ETP suffering a loss.

Index Disclaimer

The Index is created, calculated and published by Solactive AG. No financial instrument is sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index level at any time or in any other respect.
